**CONCRETE INDUSTRY MANAGEMENT (CIM) ANNOUNCES ITEMS
AVAILABLE AT 2020 AUCTION AT WORLD OF CONCRETE**

(Las Vegas, Nev. – Jan. 30, 2020) – The Concrete Industry Management (CIM) program – a business intensive program that awards students with a four-year Bachelor of Science degree in Concrete Industry Management – is pleased to announce the following list of items that have been donated for their annual auction at World of Concrete. The auction is scheduled for Wednesday, Feb. 5 in the Las Vegas Convention Center. The silent auction will be held from 11 a.m. to 12:45 p.m. PST in the North Hall Room N263 and the live auction begins at 1 p.m. PST next door in North Hall Room N262.

“Thanks to the tremendous response from the industry, we anticipate having the best CIM auction ever,” said Ben Robuck, CIM Auction Chairman. “In addition to a concrete mixer truck donated by Mack Trucks, Inc. and McNeilus, a Somero Enterprises, Inc. laser screed, a Load and Go truck wash system by Shumaker Industries, a ROXOR work vehicle by Mahindra Automotive North America and clean out package by Silo Pros, we have a variety of items targeted specifically for the concrete and construction industry.”

“The National Steering Committee (NSC) is pleased by the overwhelming support by the concrete industry with their contributions to the CIM program,” said CIM Marketing Committee Chairman Brian Gallagher. “Bidders will have many opportunities to support the CIM program while simultaneously purchasing equipment and products they will need for their day-to-day operations - this is win-win for everyone!”

While the list of items continues to grow, as of Jan. 24, the list of auction items includes:

Bidding can begin on the 100+ items in the silent auction immediately and continue bidding on any mobile device straight through the event. The live auction items will only be available for bidding during the event itself but can be bid on either in person or on-line. Auction participation instructions are available on the CIM website at <http://concretedegree.com/auction/>.

About CIM

Receiving tremendous support from the concrete industry, the CIM program was the first of its kind in United States – a four-year Bachelor of Science degree in Concrete Industry Management. The need for such a program was recognized through the RMC 2000 movement in 1994 and was put into action by the Tennessee concrete industry. The end-result was a partnership between the concrete industry and Middle Tennessee State University (MTSU) to develop the CIM program, implementing it with its first two students in 1996, and producing its first graduates in 2000. Since its humble beginning, the CIM program has expanded and now in addition to MTSU, it is offered at California State University, Chico, Texas State University and the New Jersey Institute of Technology. Today there are more than 470 students pursuing degrees in Concrete Industry Management, and hundreds of CIM graduates working in the concrete industry.

The goal of the program is to produce broadly educated, articulate graduates grounded in basic construction management, who are knowledgeable of concrete technology and techniques and are able to manage people and systems as well as promote products or services related to the concrete industry. It entails a broad range of courses, from English and history to science and mathematics. A series of required business courses such as finance, marketing, management and business law are also taken throughout the length of the program.

The CIM program continues to provide future leaders for the concrete industry. To learn more about the program, visit www.concretedegree.com.
