CIM ANNOUNCES AUCTION ITEMS AVAILABLE FOR ANNUAL AUCTION AT WORLD OF CONCRETE ON JAN. 18

(Las Vegas, Nev. – Jan. 11, 2023)—The Concrete Industry Management (CIM) program—a business intensive program that awards students with a four-year Bachelor of Science degree in Concrete Industry Management—is pleased to announce all auction items available for next week’s auction at World of Concrete in Las Vegas.

“We are very appreciative of the continued support from the concrete industry,” said Ben Robuck, CIM Auction Committee Chairman. “Their support speaks volumes to the importance these companies place on the CIM program. These items will help ensure a successful CIM Auction at the 2023 World of Concrete.”

The auction’s featured items include:

A truck-mounted concrete pump donated by Alliance Concrete Pumps, Papé® Kenworth and Kenworth Truck Company. [View details of this item here.](#)

A 2023 Mack® Granite® GRFR model equipped with a McNeilus® FLEX Controls™ Bridgemaster™ mixer. [View details of this item here.](#)

Peterbilt Motors Company 2023 Model 567 with a Con-Tech Manufacturing, Inc. Extreme Duty Mixer. [View details of this item here.](#)

A Somero ® S-485 Laser Screed® machine donated by Somero Enterprises, Inc. [View details of this item here.](#)

The total list of all items (as of Jan. 2) available at our upcoming auction on Jan. 18 include:

About CIM

Receiving tremendous support from the concrete industry, the CIM program was the first of its kind in United States – a four-year Bachelor of Science degree in Concrete Industry Management. Since its humble beginning, the CIM program has expanded and offered at Middle Tennessee State University, California State University, Chico, Texas State University, New Jersey Institute of Technology and our newest program at South Dakota State University. Today, there are more than 1,500 graduates of the Concrete Industry Management program working in the industry.

The goal of the program is to produce broadly educated, articulate graduates grounded in basic construction management, who are knowledgeable of concrete technology and techniques and can manage people and systems as well as promote products or services related to the concrete industry. It entails a broad range of courses, from English and history to science and mathematics. A series of required business courses such as finance, marketing, management and business law are also taken throughout the length of the program.

The concrete-specific courses teach the fundamentals of concrete, properties and testing, concrete construction and more. All of these courses provide much more than what is simply in the text – they emphasize problem solving, quality assurance and customer satisfaction. They utilize practical case studies and an internship to make sure the student obtains real-world experience essential to starting a successful career. Additional opportunities include on-campus socials and other events providing industry networking and professional development.

In 2012, an Executive MBA program was added by the CIM National Steering Committee. The CIM Executive MBA is specifically designed for individuals with three or more years of experience in the industry.

The CIM program has provided and continues to provide future leaders for the concrete industry. To learn more about the program, visit www.concretedegree.com.
