**CONTRACTOR-FOCUSED ITEMS AVAILABLE
AT 2025 CIM AUCTION AT WORLD OF CONCRETE**

(Las Vegas, Nev. – Jan. 15, 2025) – The Concrete Industry Management (CIM) program – a business-intensive program that awards students with a four-year Bachelor of Science degree in Concrete Industry Management – is pleased to announce the following list of contractor-focused items have been donated for its annual auction on Jan. 22, 2025, at World of Concrete in Las Vegas, Nev.

"The unwavering support from the concrete industry year after year has been truly remarkable and this year is no exception," said Ben Robuck, CIM auction chairman. "The generosity of this year's donors reflects the strong value they place on the CIM program and its mission. These contributions play a significant role in ensuring the success of the 2025 CIM Auction at World of Concrete, and we are deeply grateful for their continued partnership."

The auction's featured items include:

- Truck-Mounted 38M Concrete Pump donated by Alliance Concrete Pumps, Papé® Kenworth and Kenworth Truck Company. [View details of this item here.](#)
- 2025 Mack® Granite® 64FR chassis donated by Mack Trucks and equipped with an 11-yard Revolution® Bridgemaster™ mixer donated by Revolution Concrete Mixers. [View details of this item here.](#)

About CIM

Receiving tremendous support from the concrete industry, the CIM program was the first of its kind in United States – a four-year Bachelor of Science degree in Concrete Industry Management. Since its humble beginning, the CIM program has expanded and offered at Middle Tennessee State University, California State University, Chico, Texas State University, New Jersey Institute of Technology and South Dakota State University. Today there are more than 1,640+ graduates of the Concrete Industry Management working in the concrete industry.

The goal of the program is to produce broadly educated, articulate graduates grounded in basic construction management, who are knowledgeable of concrete technology and techniques and can manage people and systems as well as promote products or services related to the concrete industry. It entails a broad range of courses, from English and history to science and mathematics. A series of required business courses such as finance, marketing, management and business law are also taken throughout the length of the program.

The concrete-specific courses teach the fundamentals of concrete, properties and testing, concrete construction and more. All these courses provide much more than what is simply in the text – they emphasize problem-solving, quality assurance and customer satisfaction. They utilize practical case studies and an internship to make sure the student obtains real-world experience essential to starting a successful career. Additional opportunities include on-campus socials and other events providing industry networking and professional development.

The CIM program continues to provide future leaders for the concrete industry. To learn more about the program, visit www.concretedegree.com.
