**READY MIXED CONCRETE ITEMS AVAILABLE AT 2025 CIM
AUCTION AT WORLD OF CONCRETE**

(Las Vegas, Nev. – Jan. 14, 2025) – The Concrete Industry Management (CIM) program – a business-intensive program that awards students with a four-year Bachelor of Science degree in Concrete Industry Management – is pleased to announce the following list of ready mixed items donated for its annual auction on Jan. 22, 2025, at World of Concrete in Las Vegas, Nev.

"The success of the CIM Auction is a testament to the power of collaboration within the concrete industry," said Ben Robuck, CIM Auction Chairman. "The generosity and commitment from our industry partners not only drive the growth of this event but also directly contribute to the future of our program and its students. We are inspired by their support and proud to work together towards shaping the leaders of tomorrow."

"This auction showcases the unique collaboration between the CIM program and the industry that supports it," said CIM Marketing Committee Chairman Brian Gallagher. "It's an exciting opportunity for companies to invest in the future of the concrete industry while securing valuable resources for their operations. Together, we're building a stronger industry and empowering the next generation of leaders."

The auction's featured items include:

- Truck-Mounted 38M Concrete Pump donated by Alliance Concrete Pumps, Papé® Kenworth and Kenworth Truck Company. [View details of this item here.](#)

About CIM

Receiving tremendous support from the concrete industry, the CIM program was the first of its kind in United States – a four-year Bachelor of Science degree in Concrete Industry Management. Since its humble beginning, the CIM program has expanded and offered at Middle Tennessee State University, California State University, Chico, Texas State University, New Jersey Institute of Technology and South Dakota State University. Today there are more than 1,640+ graduates of the Concrete Industry Management working in the concrete industry.

The goal of the program is to produce broadly educated, articulate graduates grounded in basic construction management, who are knowledgeable of concrete technology and techniques and can manage people and systems as well as promote products or services related to the concrete industry. It entails a broad range of courses, from English and history to science and mathematics. A series of required business courses such as finance, marketing, management and business law are also taken throughout the length of the program.

The concrete-specific courses teach the fundamentals of concrete, properties and testing, concrete construction and more. All these courses provide much more than what is simply in the text – they emphasize problem solving, quality assurance and customer satisfaction. They utilize practical case studies and an internship to make sure the student obtains real-world experience essential to starting a successful career. Additional opportunities include on-campus socials and other events providing industry networking and professional development.

The CIM program continues to provide future leaders for the concrete industry. To learn more about the program, visit www.concretedegree.com.
